## Inside this issue:

**Kerr's increases its already large range again** 1

**Intelligent Access** 2

**Soff Cut now at Kerr's** 2

## New Equipment Purchased:

- **JLG 450AJ 45ft Knuckle Boom.** Great reach with zero swing.
- **JLG 26ft MRT Scissor.** Compact 4wd access.
- **Takeuchi 1.6 tonne Excavator.** Powerful compact digging.
- **Raza Deck 2m Work Platform.** An ingenious piece of scaffolding.
- **Husqvarna TS73R Tile Saw.** Cut tiles wet with ease.
- **Husqvarna 150 Soft Cut Saw.** Stress cut your new slab on the day you pour it.

**New Husqvarna TS73R Tile Saw.**

## Kerr's increases its already large range again.

Kerr's has once again increased its large plant range to include another new boom lift a 1.6 tonne mini excavator & a 26ft Rough Terrain Scissor. These are added to the more recent purchases of a 60ft boom lift and 5.6 tonne excavator. "The demand in the area for new quality equipment is due to the high level of building projects happening in Geelong," Gary Kerr of Kerr's.

Kerr's has updated its 45ft boom range adding a new JLG 450AJ series 2 45 ft Knuckle boom to its growing access fleet. This current 450 has a maximum platform height of 13.7m (45ft) and a maximum reach of 7.4m at 7.39m off the ground. This new boom comes with the sky power option with an onboard 5 KVA generator delivering power directly to the basket.

**Kerr's JLG 450AJ 45ft Boom Lift.**

A new 26ft rough terrain scissor was also added to Kerr's access fleet recently. The JLG 26 MRT scissor is one of the most powerful compact RTS scissors on the market. It boasts a 26 hp Kubota diesel engine that transfers high torque to the 4 wheel motors which makes it easier to negotiate the roughest terrain. The self levelling out riggers make setting up on an uneven surface a breeze.

**Kerr's JLG 26 MRT 26ft Scissor Lift.**

A brand new Takeuchi excavator was also purchased adding to Kerr's large earthmoving range. The Takeuchi 1.6 tonne excavator replaced one of Kerr's aging Libra 1.5 excavators. This new excavator has the highest bucket break out force in its class at 1900 kg, compared to the Libras 1600kg. This is because of the longer blade arm which provides the counter weight with a greater leverage and also creates greater stability.

For more information go to [www.kerrshire.com.au](http://www.kerrshire.com.au) or call Kerr's on 52786011.

## Intelligent Access

The new Razadeck 200 for Hire now at Kerr's.

Kerr's has recently become a reseller for the ingenious Razadeck 200 scaffold. This scaffold is one of three types of unique access equipment that Kerr's is now selling on behalf of No Bolt scaffolding.

Powered by an internal spring mechanism, the Razadeck is a folding scaffold that is easy to use, quick to install, and gives you access to a working height of up to 4 metres. Razadeck is a one-piece design (no loose components) with a deck that provides enough space for you and your tools. Razadeck requires minimal training to erect or dismantle.

Just pop it in your van, the back of the ute or in the station wagon and away you go.

One of the great safety features the Razadeck 200 offers is that regardless at what height you intend to use it, the handrails are always set up first. When working at a standing height of 2 metres, the deck is reached by ascending the internal access ladder – simply step through the frame and ascend through the inside, through the trap door onto the deck.

### Features:

- Three platform heights: 0.5 metre, 1 metre and 2 metre.
- Adjustable stabilisers
- Integrated ladder
- Fits through standard doorways
- Simple operation, no formal training or license required
- Lightweight and compact, easy transport and storage
- One-piece design, no loose components

For more information go to [www.kerrshire.com.au](http://www.kerrshire.com.au) or call Kerr's on 52786011.

**Hire the Razadeck 200 for \$75 per day or \$225 for 7 days.**  
For Sales enquires contact Jarrod Kerr on 52786011

## Soff Cut now at Kerr's

With the recent acquisition of Soff-Cut International by Husqvarna, Kerr's is now the exclusive supplier of Soff-Cut early entry saws & blades in the Geelong & Surfcoast area. Kerr's add this new venture to the growing range of concrete equipment that is already available at Kerr's. "We always have guaranteed 100 % after sales service and expertise to all our products and Soff-Cut is no exception." Jarrod Kerr

Soff-Cut is the leading producer of concrete saws for early entry concrete sawing. This technology enables concrete to be cut before it is fully set, which minimizes the risk of random cracking and also simplifies the working process in comparison with conventional sawing.

**The Problem:** Of the problems facing concrete contractors, random cracking is among the most costly and aggravating. Random cracking is particularly troubling because it immediately casts doubt on concrete quality, leading to owner dissatisfaction, callbacks and disputes.

**The Solution:** Soff-Cut has the only Ultra Early Entry dry-cutting system which controls random cracking through the early timing of the cut. With the Soff-Cut Ultra Early Entry method, control joints are cut within one to two hours during

the finishing process and before final set. The control joints are not as deep as the traditional method - as little as 1" - and the chance of random cracks occurring is minimized.

**How does it Work?** As concrete hydrates and begins to set, it develops internal stresses. The objective in controlling random cracking is to relieve these stresses before they seek their own relief in the form of a random crack. The up-cutting rotation of the blade combines with the patented skid plate by applying pressure to the surface to prevent chipping or spalling.

For more information go to [www.kerrshire.com.au](http://www.kerrshire.com.au) or call Kerr's on 52786011.
